

# Pilot's Notes

**Propeller logos are individually printed, or printed along with the spec table giving the correct positioning. Cut out one at a time as required using a sharp blade. Soak airscale decals in water to use.**

**Tips:** Decals adhere better to gloss surfaces. If required, use decal setting solution to adhere to raised details. Test fit to ensure alignment. Cut out or trim decals using a very sharp blade to avoid tearing. Store decals in a dark, dry place.

## Propeller Logo Guide:

<p>SWD NO. 1027 - 102 - 1195 WFO NO. AP12566 LOW ANG. 26.9 HIGH ANG. 66.9 CORR. ANG. + 1</p> 	<p><b>Aeroproducts</b> e.g. P51D/K Mustang, P68 Kingcobra, F8F Bearcat <small>Note: separate logos are also included</small></p>
