Notes on the Drawings

The preceding illustrations are intended to show only basic camouflage and markings placement information. Due to the limited nature of quality photography of many of these aircraft, we have not attempted to portray the definitive and precise camouflage patterns applied to them. Also, the individual's interpretation of photographs or drawings can cause wide variation in what the "exact" pattern or colors are perceived to be. We highly encourage you to avail yourself of as many references for the particular aircraft you wish to model as possible.

National insignias are not included in all cases, however those required for the Bf-109s and Fw-190s illustrated may be obtained from AeroMaster sheets 48-019 through 48-024. Unless otherwise indicated, all national insignias are "standard" for the type as supplied in the above sets.
