Aichi D3A1 Val

1/32 AIRCRAFT SERIES NO.06 — FUSELAGE LENGTH 319 MM

Úvod

Aichi D3A Type 99 (spojenecký název „Val“) byl hlavním typem střemhlavého bombardéru japonského císařského námořního letectva ve II světové válce. „Val“ byl první japonské letadlo, které ve válce bombardovalo americké cíle, počínaje Pearl Harborem a americkými základnami na Filipínách. Na počátku války vzletl z palub letadlových lodí, později z pozemních základů a účastnil se bojů v Korálovém moři, v bitvě u Midway, či v bojích o Salomounovy ostrovy. Tato letadla potopila více spojeneckých válečných lodí než kterékoli jiné letadlo Osy. Vývoj D3A byl zahájen roku 1936 a od roku 1937 do roku 1945 bylo vyrobeno 1495 bombardérů v několika produkčních variantách.

Introduction

The Aichi D3A Type 99 (Allied name „Val“) is a World War II carrier dive bomber. It was the main dive bomber of the IJN and was involved in almost all IJN actions, including the attack on Pearl Harbor. „Val“ was the first Japanese aircraft to bomb American targets in the war, commencing with Pearl Harbor and U.S. bases in the Philippines. They sank more Allied warships than any other Axis aircraft. Development of „Val“ was from 1936 to 1939, 1495 bombers was manufactured.

Doporučujeme / We recommend

Additional sets for D3A1 Val kit:

- › INF3206 1+ Photoetched detail set
- › INF3206 2+ Weapon set (bombs)
- › INF3206 3+ Exhausts set
- › INF3206 4+ Engine set
- › INF3206 5+ Wing tip's navigation lights
- › INF3206 6+ Type 92 machine gun
- › INF3206 7+ Folded wings
