

BR72209 EE/BAC Lightning Landing Gear Set

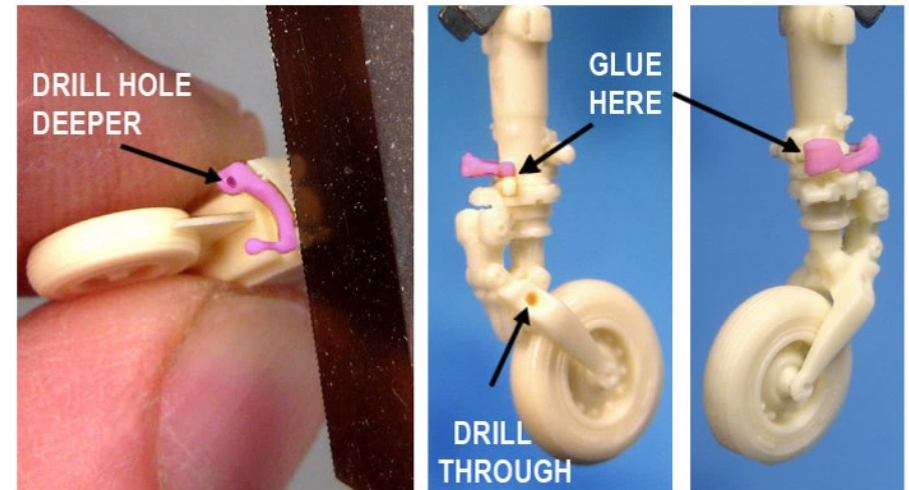

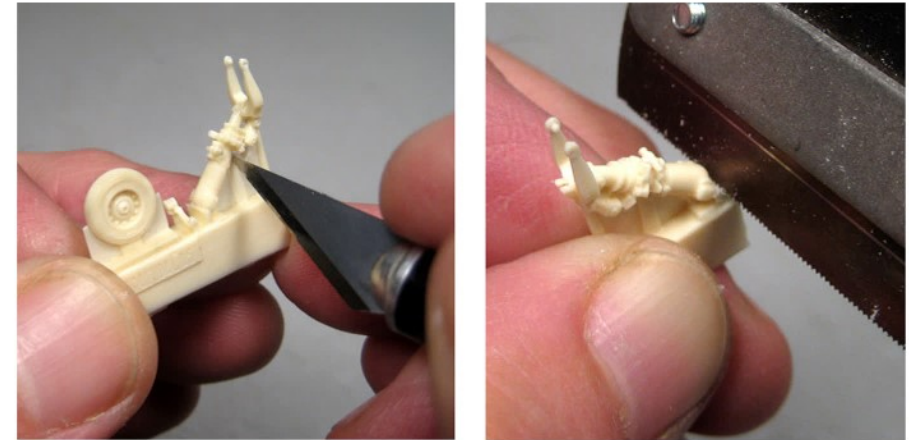

Designed for 1/72 Airfix new tool Lightnings. May be made to fit all other Lightning kits.

Master patterns by Michael O'Hare

This set contains a new resin nosegear with separate detailed leg and nosewheel, as well as a pair of improved mainwheels.

- 1) Carefully remove nosegear leg from the block by scoring w hobby knife. Cleanup pour stubs and flash with sandpaper. Remove, cleanup and install steering gear as shown.
- 2) Break casting wings off with pliers. Carefully saw all wheels from mounts and clean up. Block sand flats so that wheels sit perpendicular to the ground. Remove tabs from main gear leg axles. See image to right.
- 3) Paint wheel hubs and gearlegs dull silver and tires a dark grey rubber color.
- 4) Install nosegear leg and wheels with Cyanoacrylate (super glue) as per kit directions. Repeat as necessary! Enjoy.

Happy modelling! *Roy*
