Special Thanks to LCDR Gabe Pincelli, Naval Aviator/Master Model Builder for his reference help on this sheet!

An easy way to "cheat" to be able to make sure your decals align correctly with this complex paint scheme is to make a photo-copy of the decal sheet and lay them on the model. Then mark your paint scheme to conform to the decals.

You think painting this one is going to be tough? Try drawing it! This one was painful...
The actual jet that flew at Miramar NAS is depicted on this sheet. The jet at the Air Museum in San Diego, CA does not carry the same scheme as the actual jet. Check your references!
