Acro Deltas Demo Team

In 1964-1965 the Swedish Air Force formed a display team called The Acro Deltas. The personnel and aircraft came from F18 wing in Tullinge.

The Acro Deltas used the B-version of the J-35 Draken.. Major outer differences compared with the J-35F/J Draken were a different canopy and a different fin tip.

The aircraft in the display team had a special painted vertical fin. Large parts of the fin were blue, a wide portion of the leading edge was yellow. The display team's logo was also yellow. The colors/shades of these markings were the same as on the Swedish national insignia.

Initially the aircraft did not carry any tactical codes, but later these were painted on the fuselage, beneath the vertical fin.

Maestro Models

All the resin accessories you need to back-convert your Hasegawa Draken to a B model are available from Maestro Models of Sweden.

These accessories can be purchased from Max Nykvist at Rebell Hobbies.

Visit their website at <http://www.rebell.com>

Note:
Repeat all basic stencil markings on all jets.
Optional markings for four other jets are on the decal sheet.

Special Thanks to Emil Lindbergh and Max Nykvist for their exceptional help in gathering references for this decal sheet.

Twobobs' goal is to provide you with the most thoroughly researched decals that money can buy. We go beyond using traditional reference resources and many times speak with the actual aircrews and maintainers of our subject matter. Being modelers ourselves, we understand that there is no substitute for this painstaking research and we are proud to offer, what we feel, are the best decals on the market. If you have any subject matter that you feel should be the next Twobobs creation, let us know. We'll be happy to listen to any and all customer input.
